

# JOY TO *the world*

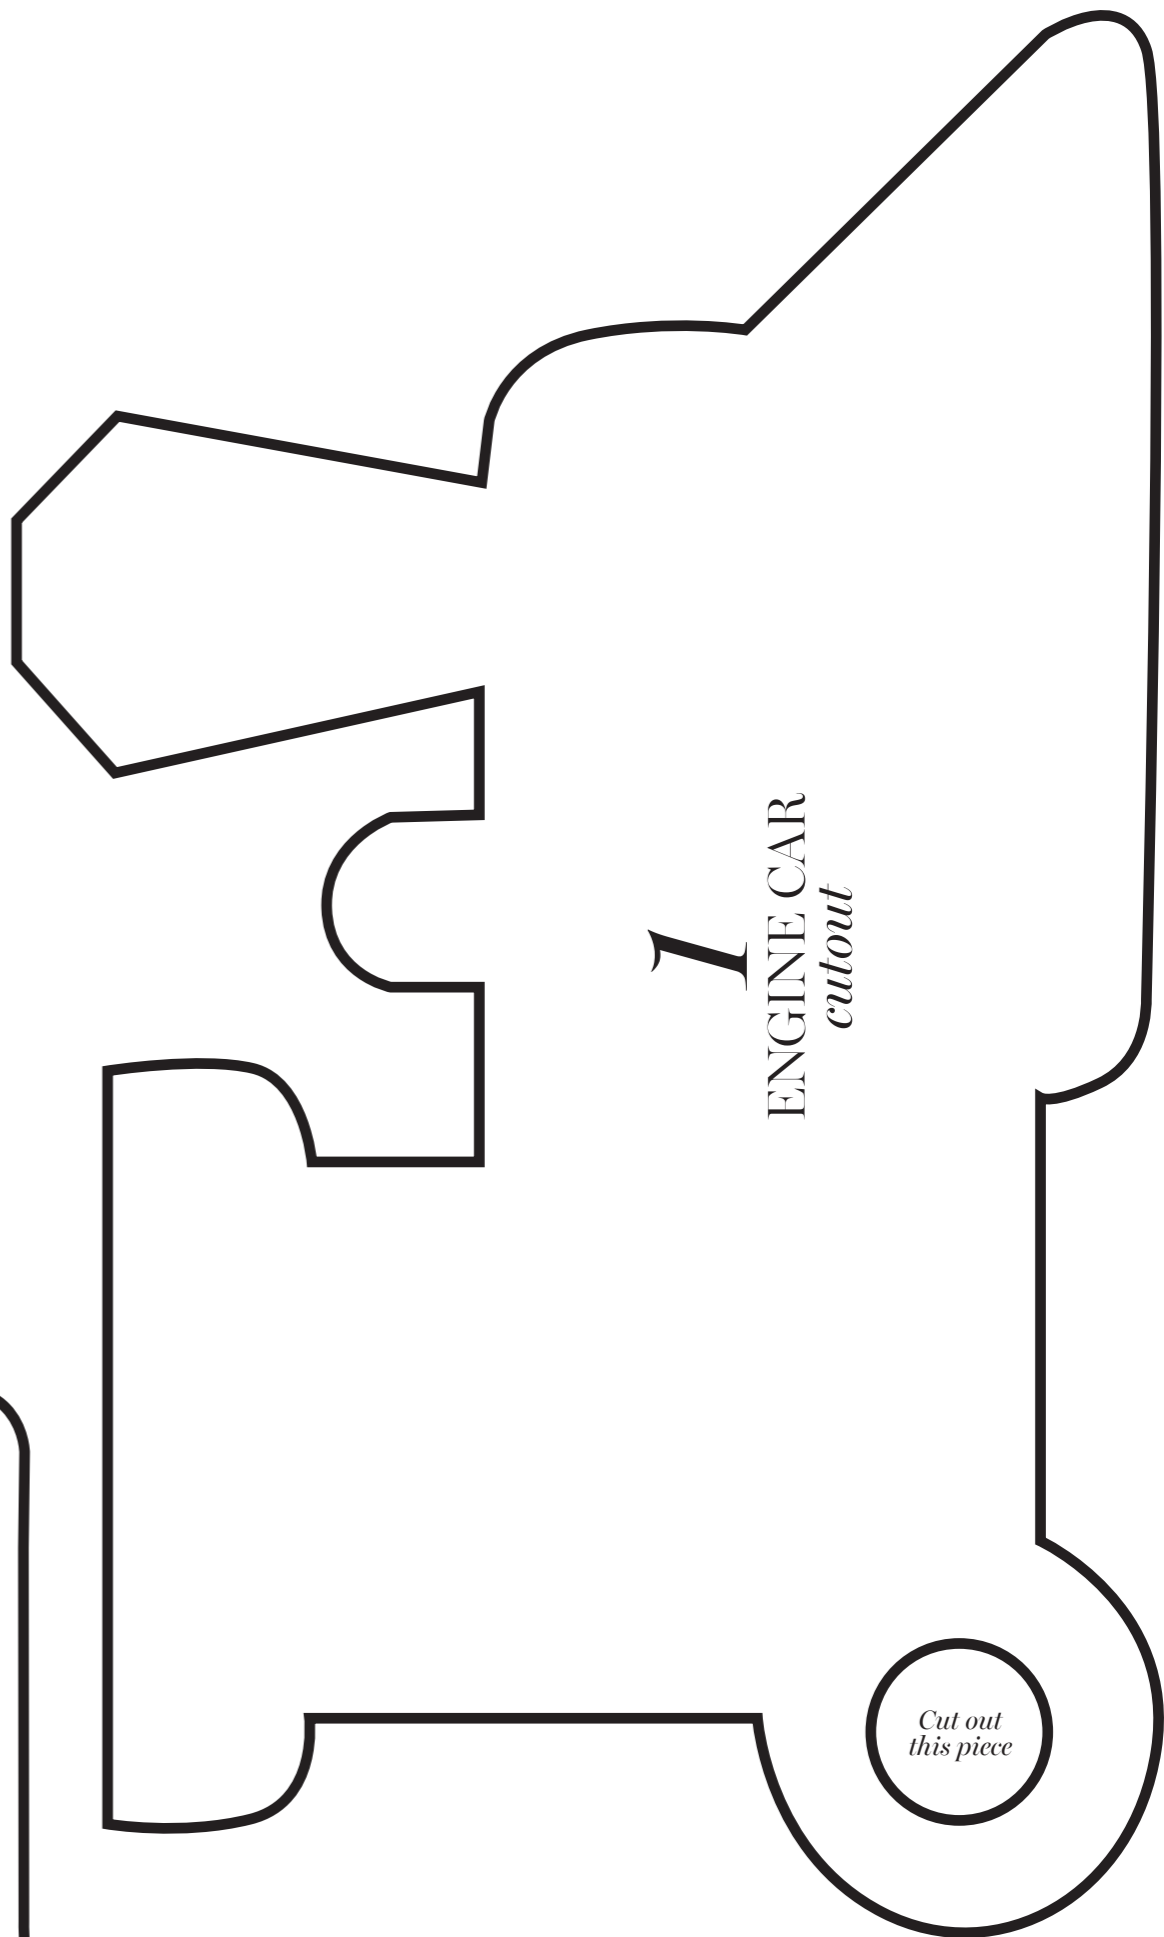

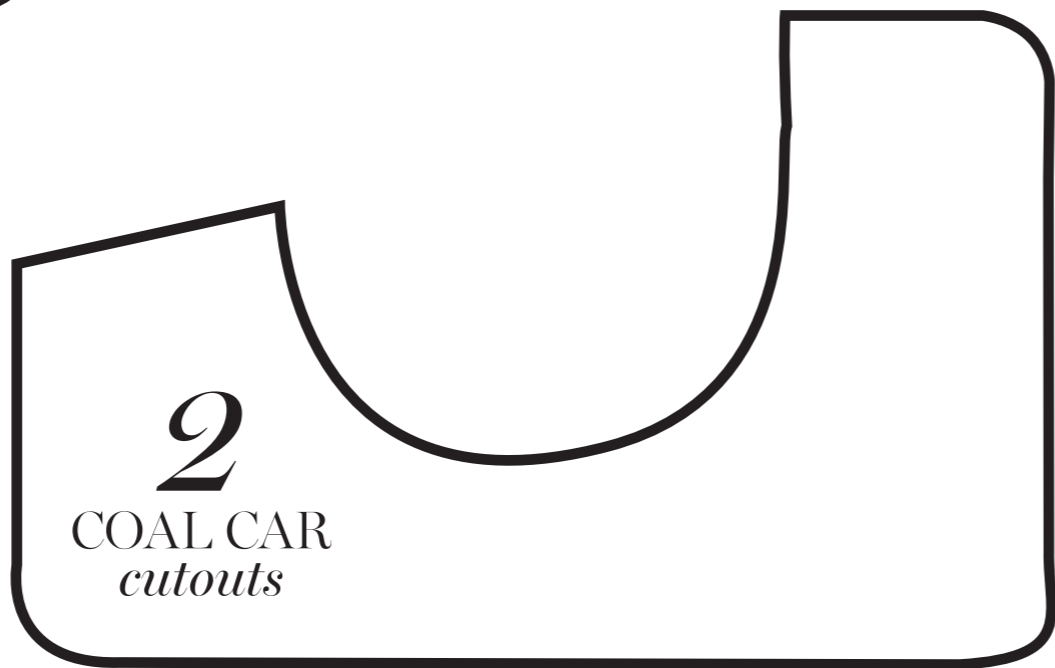

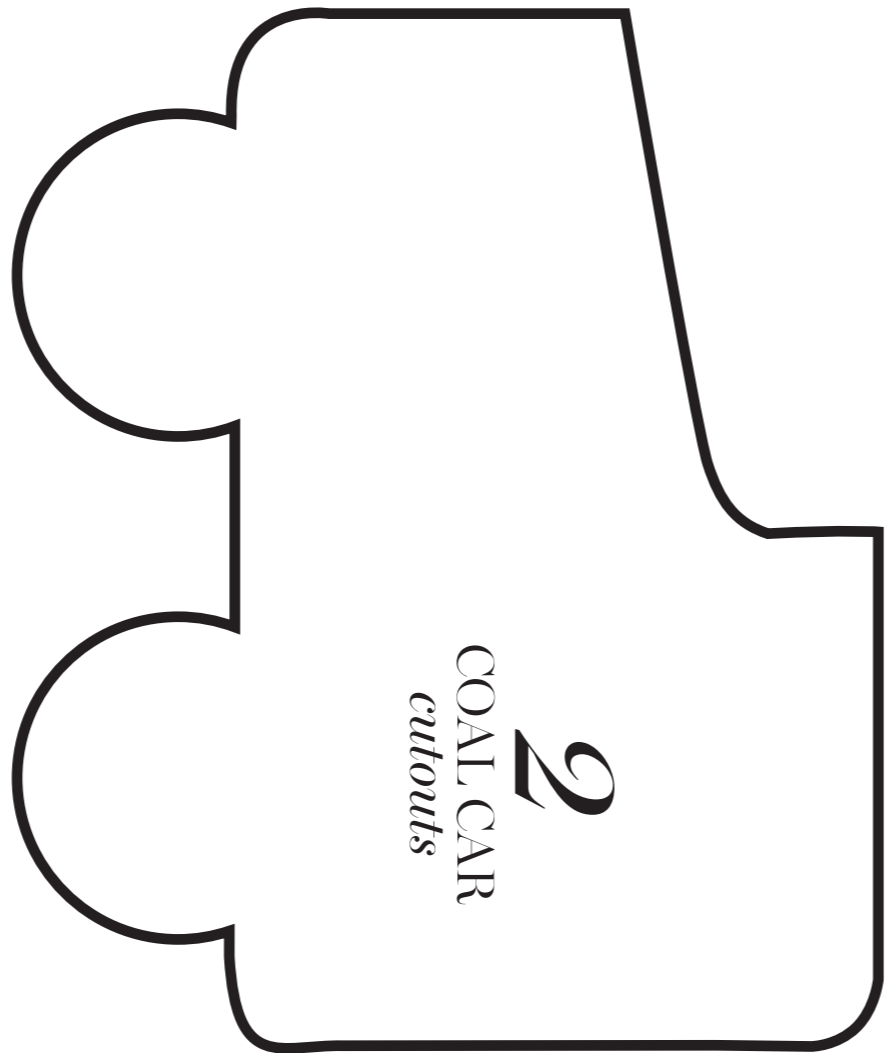

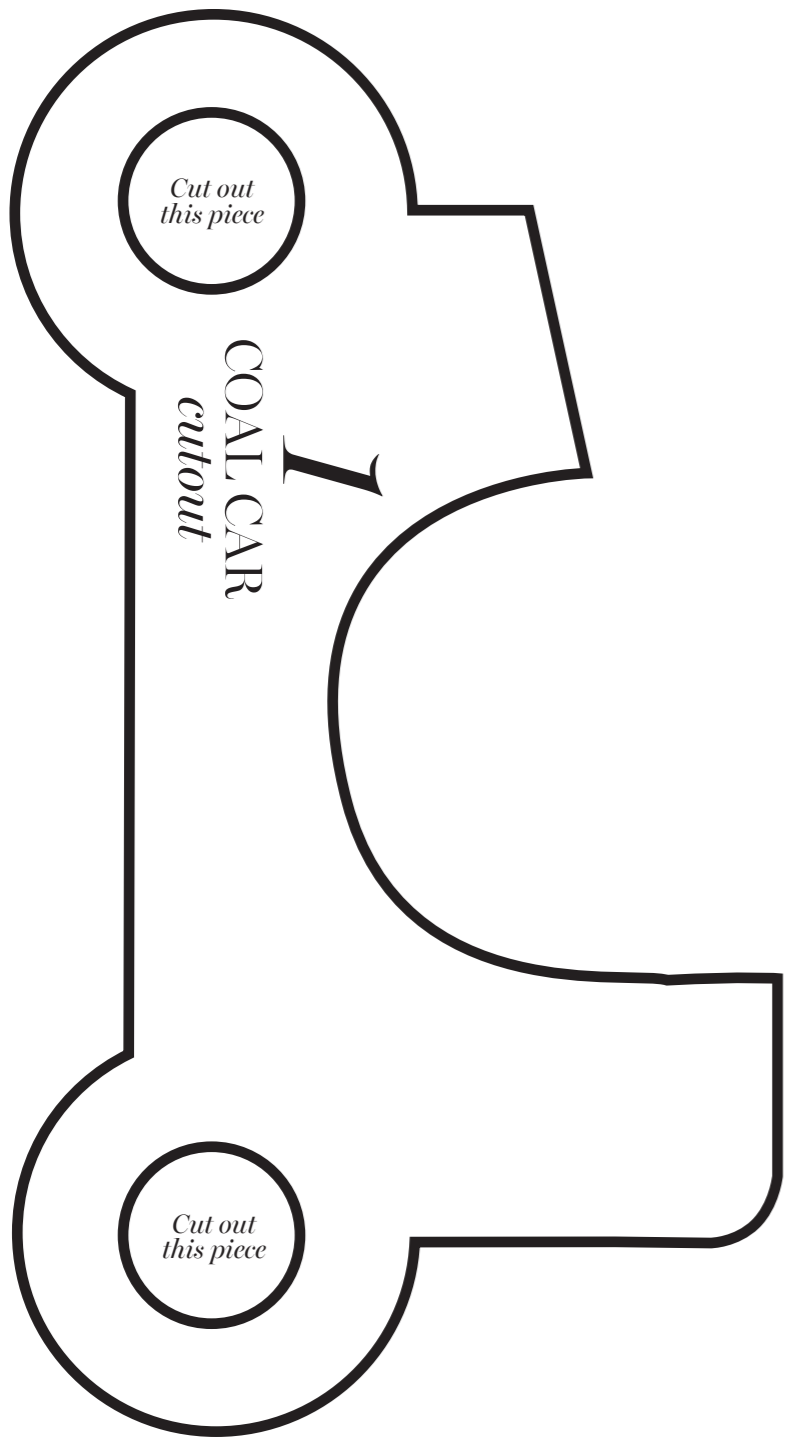

To make this 3D Gingerbread Train, use this template as your cookie cutter, and trace around with a sharp knife. The number of each piece is indicated on the cut-out.

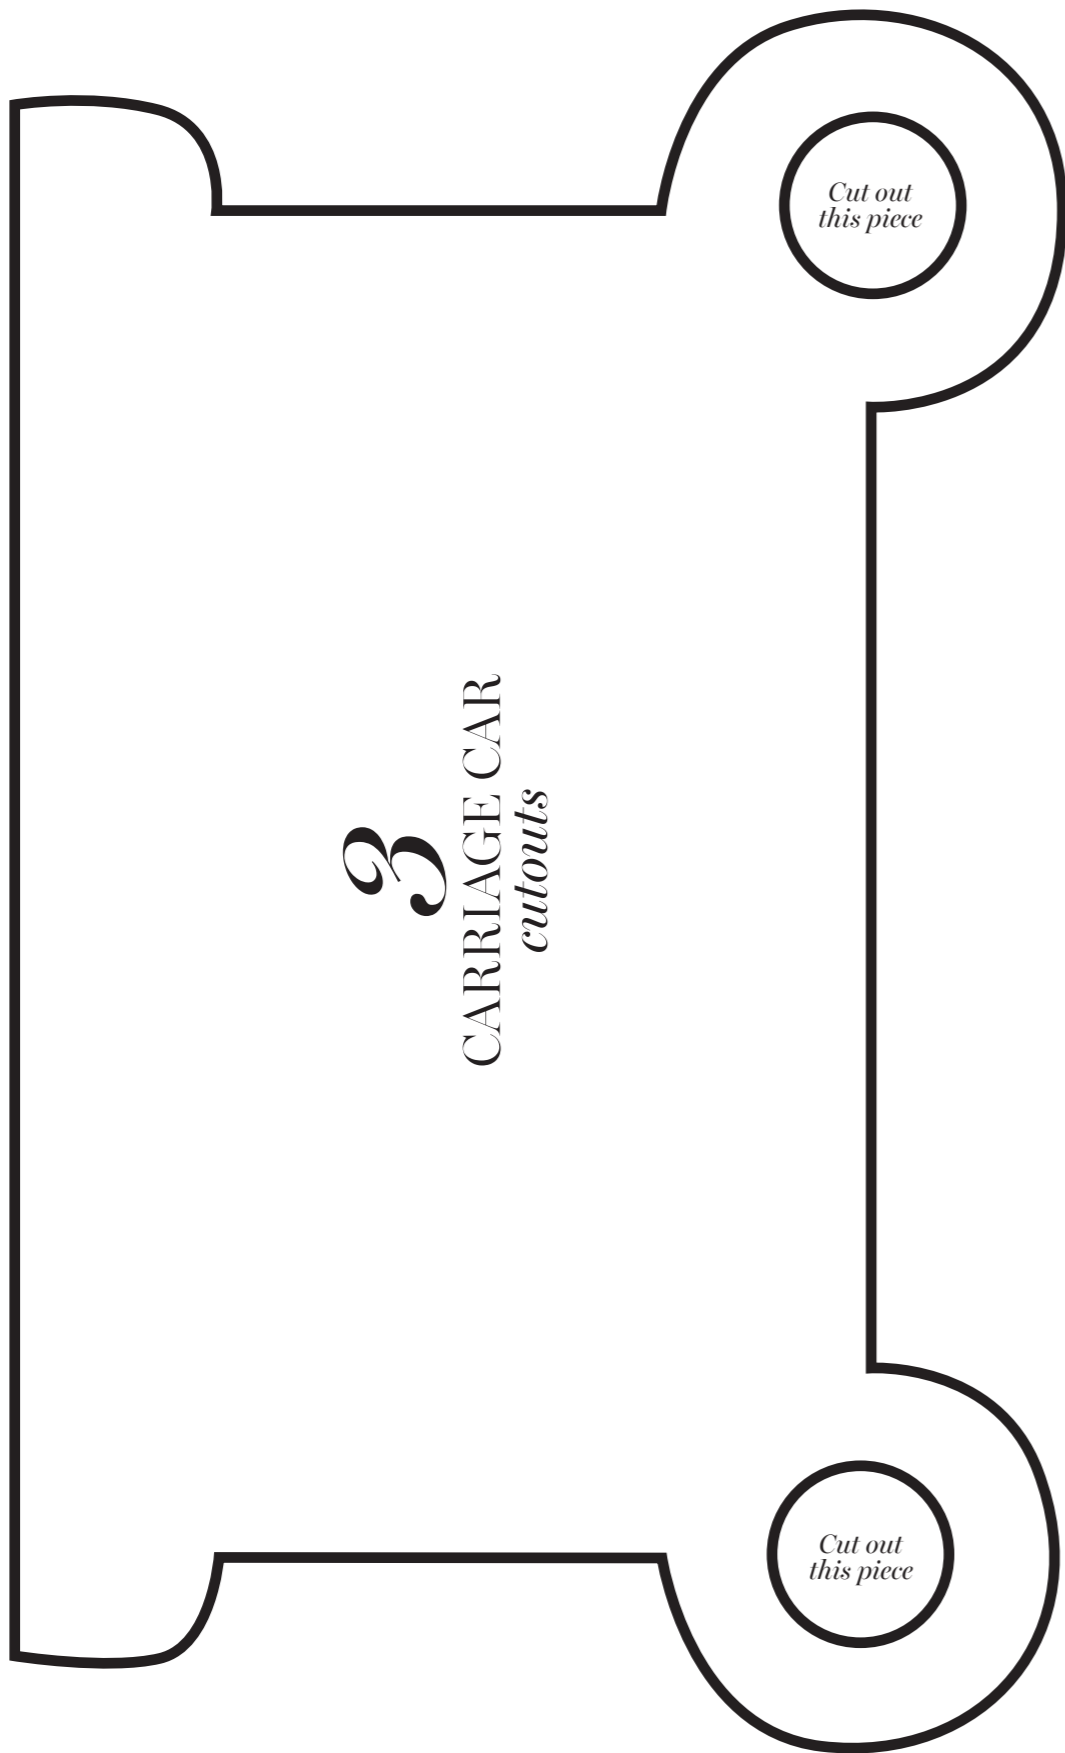

There are five pieces per carriage, and five carriages in total. The middle piece of each carriage has the joining cart-to-cart ring. There are two outside pieces to each car, then two supporting pieces that surround this connecting middle piece.

All outside wheels are purchased wafers - not included in this recipe.

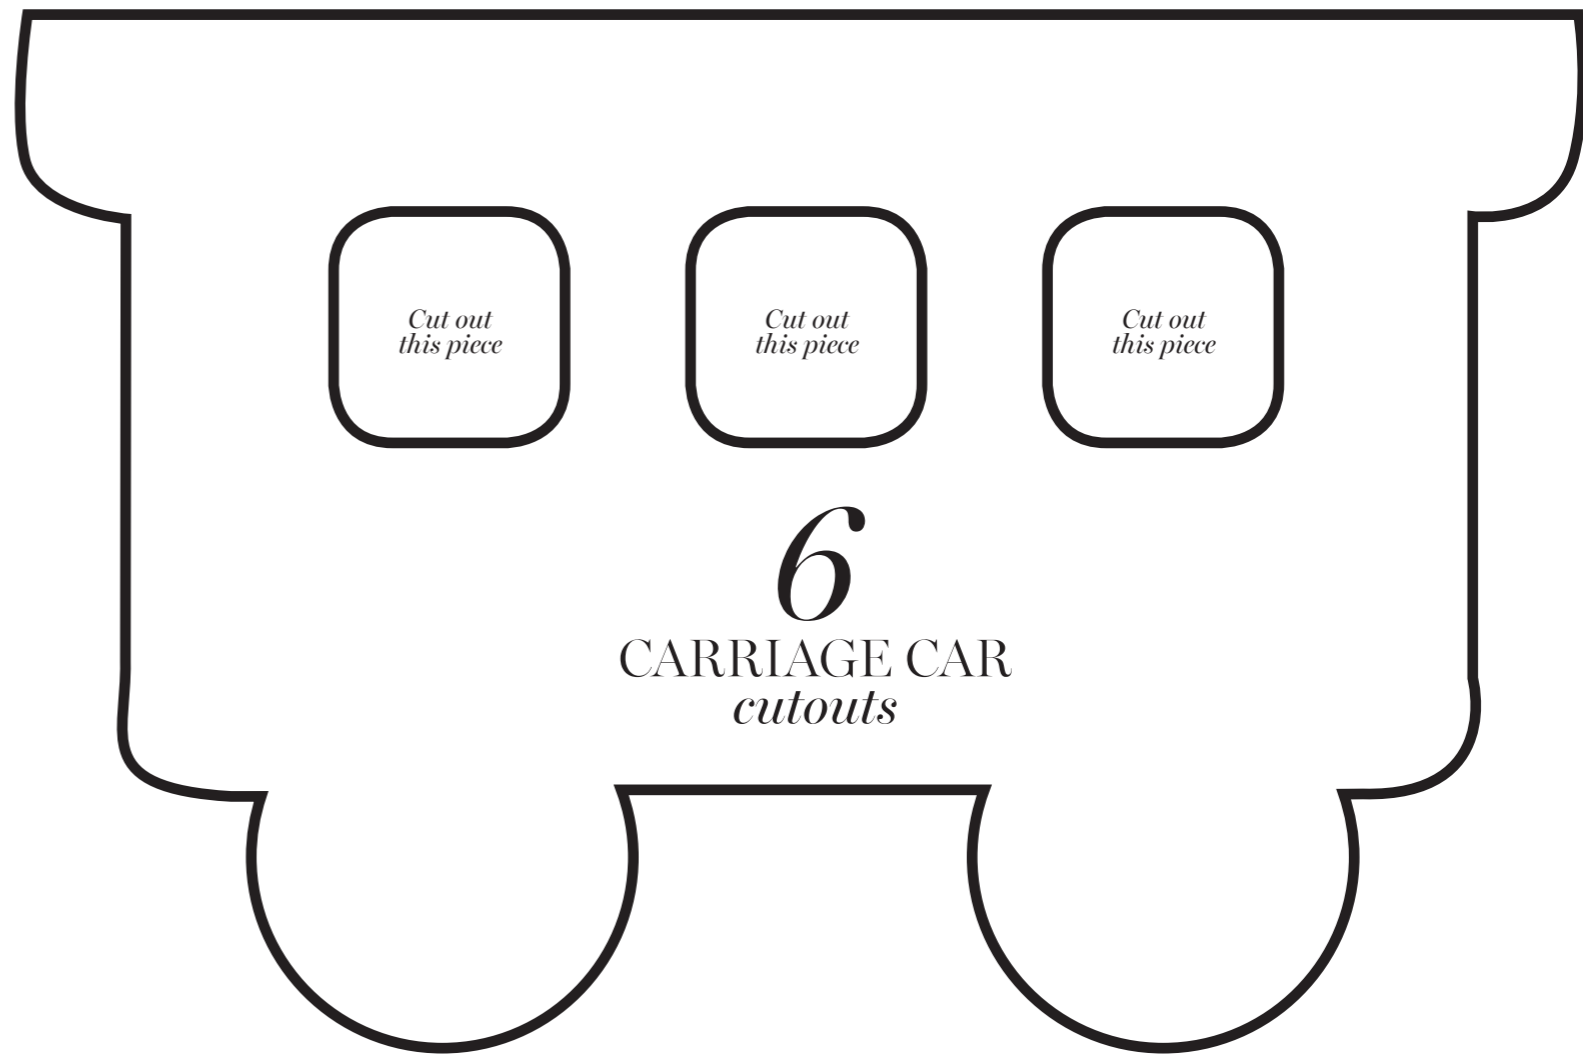

Time to start your show-stopping masterpiece!
